

## How to apply blue casting removal function for Text Document in ScanWizard DI V2.0 or later version

If the setting of Scan Type is RGB Color ( 24 bits ), the scan target is text document. By this way, you can change the setting of Attribute from “ Photo “ to “ Text “, after that, the function of blue casting removal will be applied in ScanWizard DI automatically.

Here is a preview image when the setting of Attribute is “ Photo “.

Here is a preview image when the setting of Attribute is “ Text “.

The light blue in preview image of text document will be gone after the setting of Attribute is changed from “ Photo “ to “ Text “. By this way, the function of blue casting removal will be applied in ScanWizard DI V2.0 or its later version automatically.
